

Computer Science: Introduction to Digital Game Graphics

Identify the target audience of a game [GD2.1](#)

1 Identify the target audience of a game [GD2.1](#)

Explain impact of “feature creep” on production [GD2.2](#)

2 Explain impact of “feature creep” on production [GD2.2](#)

Explain the interdependence of team members between artistic, technical and production disciplines [GD2.3](#)

3 Explain the interdependence of team members between artistic, technical and production disciplines [GD2.3](#)

Explain the purpose of prototyping [GD2.4](#)

4 Explain the purpose of prototyping [GD2.4](#)

Outline in detail the process of developing a game from concept to delivery and support [GD2.5](#)

5 Outline in detail the process of developing a game from concept to delivery and support [GD2.5](#)

Describe each step of the production process [GD2.6](#)

6 Describe each step of the production process [GD2.6](#)

Explain how the project is going to be managed according to a milestone plan [GD2.7](#)

7 Explain how the project is going to be managed according to a milestone plan [GD2.7](#)

Explain the various types of collaboration tools GD2.8

8 Explain the various types of collaboration tools GD2.8

Utilize the production pipeline in the development of a game GD2.9

9 Utilize the production pipeline in the development of a game GD2.9

Explain the value of version control GD2.10

10 Explain the value of version control GD2.10

Explain the purpose of vertical slice GD2.11

11 Explain the purpose of vertical slice GD2.11

Demonstrate version control for example, Node Version Manager (NVM) GD2.12

12 Demonstrate version control for example, Node Version Manager (NVM) GD2.12

Demonstrate good quality assurance practices GD2.13

13 Demonstrate good quality assurance practices GD2.13

Conceptualize and illustrate original game characters and assets GD2.14

14 Conceptualize and illustrate original game characters and assets GD2.14

Utilize illustration to create assets GD2.15

15 Utilize illustration to create assets GD2.15

Establish a standard for world scale GD2.16

16 Establish a standard for world scale GD2.16

Create a storyboard for planning animation GD2.17

17 Create a storyboard for planning animation GD2.17

Change an object's state or position over time GD2.18

18 Change an object's state or position over time GD2.18

Establish an object's relative speed GD2.19

19 Establish an object's relative speed GD2.19

Simulate a naturally occurring or mechanical cycle such as walking [GD2.20](#)

20 Simulate a naturally occurring or mechanical cycle such as walking [GD2.20](#)

Apply animation to game assets [GD2.21](#)

21 Apply animation to game assets [GD2.21](#)

Describe the role of typography [GD2.22](#)

22 Describe the role of typography [GD2.22](#)

Evaluate the use of layout and composition [GD2.23](#)

23 Evaluate the use of layout and composition [GD2.23](#)

Explain color theory [GD2.24](#)

24 Explain color theory [GD2.24](#)

Describe the principles of animation [GD2.25](#)

25 Describe the principles of animation [GD2.25](#)

Describe the role of perspective [GD2.26](#)

26 Describe the role of perspective [GD2.26](#)

Demonstrate 1- and 2-point perspectives [GD2.27](#)

27 Demonstrate 1- and 2-point perspectives [GD2.27](#)

Draw a proportionally correct figure [GD2.28](#)

28 Draw a proportionally correct figure [GD2.28](#)

Describe the characteristics and purposes of 2D, 2.5D, and 3D art [GD2.29](#)

29 Describe the characteristics and purposes of 2D, 2.5D, and 3D art [GD2.29](#)

Recognize the importance of and implement continuity of art style [GD2.30](#)

30 Recognize the importance of and implement continuity of art style [GD2.30](#)

Describe environments within a game [GD2.31](#)

31 Describe environments within a game [GD2.31](#)

Compare the process of creating an interior vs

32 Compare the process of creating an interior vs exterior environment [GD2.32](#)

**exterior
environment** [GD2.32](#)

**Identify components in
an environment** [GD2.33](#)

33 Identify components in an environment [GD2.33](#)

**Generate terrains for a
specific
environment** [GD2.34](#)

34 Generate terrains for a specific environment [GD2.34](#)

**Create hard surface
assets** [GD2.35](#)

35 Create hard surface assets [GD2.35](#)

**Create an
environment** [GD2.36](#)

36 Create an environment [GD2.36](#)

**Develop organics for a
specific
environment** [GD2.37](#)

37 Develop organics for a specific environment [GD2.37](#)

**Describe archetypes of
characters** [GD2.38](#)

38 Describe archetypes of characters [GD2.38](#)

**Explain character
personalities and
stereotypes** [GD2.39](#)

39 Explain character personalities and stereotypes [GD2.39](#)

**Compare and contrast
methods to design
characters** [GD2.40](#)

40 Compare and contrast methods to design characters [GD2.40](#)

**Describe the character's
evolution throughout
the game** [GD2.41](#)

41 Describe the character's evolution throughout the game [GD2.41](#)

**Examine importance of
non-player characters
(NPC)** [GD2.42](#)

42 Examine importance of non-player characters (NPC) [GD2.42](#)

**Construct character(s)
for a game** [GD2.43](#)

43 Construct character(s) for a game [GD2.43](#)

**Differentiate between
syntax and
semantics** [GD2.44](#)

44 Differentiate between syntax and semantics [GD2.44](#)

Incorporate primitive data types [GD2.45](#)

45 Incorporate primitive data types [GD2.45](#)

Utilize arrays to store a list of primitive data types [GD2.46](#)

46 Utilize arrays to store a list of primitive data types [GD2.46](#)

Demonstrate input from different sources [GD2.47](#)

47 Demonstrate input from different sources [GD2.47](#)

Construct and register a callback function [GD2.48](#)

48 Construct and register a callback function [GD2.48](#)

Compare and contrast constants and variables [GD2.49](#)

49 Compare and contrast constants and variables [GD2.49](#)

Select and implement conditional control [GD2.50](#)

50 Select and implement conditional control [GD2.50](#)

Implement functions [GD2.51](#)

51 Implement functions [GD2.51](#)

Select and implement iterations (loops, recursion,) [GD2.52](#)

52 Select and implement iterations (loops, recursion,) [GD2.52](#)

Recognize and implement sequential control [GD2.53](#)

53 Recognize and implement sequential control [GD2.53](#)

Test and debug programs [GD2.54](#)

54 Test and debug programs [GD2.54](#)

Design and implement user-defined data types [GD2.55](#)

55 Design and implement user-defined data types [GD2.55](#)

Demonstrate output to different destinations [GD2.56](#)

56 Demonstrate output to different destinations [GD2.56](#)

Practice object-oriented programming

57 Practice object-oriented programming (OPP) [GD2.57](#)

(OPP) GD2.57

Identify expected input and output GD2.58

58 Identify expected input and output GD2.58

Utilize basic steps in algorithmic problem-solving GD2.59

59 Utilize basic steps in algorithmic problem-solving GD2.59

Discuss top-down versus bottom-up development GD2.60

60 Discuss top-down versus bottom-up development GD2.60

Generate test cases and expected results GD2.61

61 Generate test cases and expected results GD2.61

Apply simple data structures GD2.62

62 Apply simple data structures GD2.62

Explain how algorithms are used to produce artificial intelligence (AI) GD2.63

63 Explain how algorithms are used to produce artificial intelligence (AI) GD2.63
