

# Plus Standards: Anatomy and Physiology

## Structure and Function: Anatomy & Physiology SC.HSP.6

- 2 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the integumentary system. SC.HSP.6.2**
  - a Plan and conduct an investigation to identify patterns of organization in the integumentary system. SC.HSP.6.2.A
  - b Ask questions to clarify the role of various structures in integumentary system function. SC.HSP.6.2.B
  - c Develop and use a model to identify and describe the relationship between the structures and physiological processes of the integumentary system. SC.HSP.6.2.C
  - d Plan and conduct an investigation to gather evidence that feedback mechanisms in the integumentary system help maintain homeostasis. SC.HSP.6.2.D
  - e Engage in arguments from evidence for the role of cell division in integumentary system dysfunction. SC.HSP.6.2.E

---

- 3 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the skeletal system. SC.HSP.6.3**
  - a Plan and conduct an investigation to identify patterns of organization in the skeletal system. SC.HSP.6.3.A
  - b Develop and use a model to identify and describe the relationship between the structures and physiological processes of the skeletal system. SC.HSP.6.3.B
  - c Obtain, evaluate, and communicate information that feedback mechanisms in the skeletal system help maintain homeostasis. SC.HSP.6.3.C
  - d Develop and use a model to explain the order of events necessary for bone formation. SC.HSP.6.3.D
  - e Engage in arguments from evidence to support claims about the causes of dysfunction in the skeletal system. SC.HSP.6.3.E

---

**4 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the muscular system.** SC.HSP.6.4

- a Plan and conduct an investigation to identify patterns of organization in the muscular system. SC.HSP.6.4.A
- b Develop and use a model to identify and describe the relationship between the structures and physiological processes of the muscular system. SC.HSP.6.4.B
- c Engage in arguments from evidence that muscle contraction is the result of biochemical reactions. SC.HSP.6.4.C
- d Obtain, evaluate, and communicate that feedback mechanisms in the muscular system help maintain homeostasis. SC.HSP.6.4.D
- e Engage in arguments from evidence to support claims about the causes of dysfunction in the muscular system. SC.HSP.6.4.E

---

**5 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the nervous system.** SC.HSP.6.5

- a Plan and conduct an investigation to identify patterns of organization in the nervous system. SC.HSP.6.5.A
- b Develop and use a model to identify and describe the relationship between the structures and physiological processes of the nervous system. SC.HSP.6.5.B
- c Engage in arguments from evidence that production of a nerve impulse is the result of biochemical reactions. SC.HSP.6.5.C
- d Obtain, evaluate, and communicate evidence that feedback mechanisms in the nervous system help maintain homeostasis. SC.HSP.6.5.D
- e Engage in arguments from evidence to support claims about the causes of dysfunction in the nervous system. SC.HSP.6.5.E

---

**6 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the cardiovascular/respiratory systems.** SC.HSP.6.6

- a Plan and conduct an investigation to identify patterns of organization in the cardiovascular/respiratory systems. SC.HSP.6.6.A
- b Develop and use a model to identify and describe the relationship between the structures and physiological processes of the cardiovascular/respiratory systems. SC.HSP.6.6.B
- c Obtain, evaluate and communicate evidence that feedback mechanisms in the cardiovascular/respiratory systems help maintain homeostasis. SC.HSP.6.6.C
- d Engage in arguments from evidence to support claims about the causes of dysfunction in the cardiovascular/ respiratory systems. SC.HSP.6.6.D

---

**7 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the digestive system.** SC.HSP.6.7

- a Plan and conduct an investigation to identify patterns of organization in the digestive system. SC.HSP.6.7.A
- b Develop and use a model to identify and describe the relationship between the structures and physiological processes of the digestive system. SC.HSP.6.7.B
- c Obtain, evaluate and communicate evidence that feedback mechanisms in the digestive system help maintain homeostasis. SC.HSP.6.7.C
- d Engage in arguments from evidence to support claims about the causes of dysfunction in the digestive system. SC.HSP.6.7.D

---

**8 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the urinary system.** SC.HSP.6.8

- a Plan and conduct an investigation to identify patterns of organization in the urinary system. SC.HSP.6.8.A
- b Develop and use a model to identify and describe the relationship between the structures and physiological processes of the urinary system. SC.HSP.6.8.B
- c Obtain, evaluate and communicate evidence that feedback mechanisms in the urinary system help maintain homeostasis. SC.HSP.6.8.C
- d Engage in arguments from evidence to support claims about the causes of dysfunction in the urinary system. SC.HSP.6.8.D

---

**9 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the reproductive system.** SC.HSP.6.9

- a Plan and conduct an investigation to identify patterns of organization in the reproductive system. SC.HSP.6.9.A
- b Develop and use a model to identify and describe the relationship between the structures and physiological processes of the reproductive system. SC.HSP.6.9.B
- c Obtain, evaluate and communicate evidence that feedback mechanisms in the reproductive system help maintain homeostasis. SC.HSP.6.9.C
- d Engage in arguments from evidence to support claims about the causes of dysfunction in the reproductive system. SC.HSP.6.9.D

---

**Engineering in Health Sciences** SC.HSP.17

**1 Gather, analyze, and communicate evidence of the connection between health science careers and engineering.** SC.HSP.17.1

- a Obtain, evaluate, and communicate information related to health science careers and the various roles they fulfill within the health care system. SC.HSP.17.1.A
  - b Design a solution to a complex, real-world problem affecting body systems that can be solved through engineering. SC.HSP.17.1.B
  - c Evaluate a solution to a complex, real-world human health problem based on prioritized criteria constraints that account for interactions within and between systems. SC.HSP.17.1.C
-

**Body Systems** SC.HSP.18

**1 Gather, analyze, and communicate evidence of the connections between body systems.** SC.HSP.18.1

- a Construct and revise an explanation based on evidence for the cycling of matter and flow of energy within and between body systems. SC.HSP.18.1.A
- b Develop and use models to explain the interactions between body systems. SC.HSP.18.1.B
